With so much time spent sitting at a desk, spinal compression has become one of the major impediments to worker health and productivity. Instead of being passively supported by your chair, the You family of seating solutions encourage you to sit actively – all day and regardless of the task at hand.

With its U-shaped back suspension, the You chair introduces a revolutionary way of sitting that 'lifts' you into the proper position. Similar to sitting on a yoga ball, the You chair engages your core muscles, elongates the back, opens your chest and keeps your shoulders down and relaxed. That means you sit up tall and light on your sit bones.

YOU SIT, BUT YOU ARE NEVER STILL.

The single most important part of a healthy work environment is your chair. Unfortunately, most people don't take the time to learn how to adjust their chair so it fits them perfectly.

The You chair makes sitting fit both easy and intuitive. All controls are within easy reach so you can quickly make the adjustments you need to be at your best.

WHEN YOU SIT ALL DAY,
YOU NEED A CHAIR
THAT FUNCTIONS THE
WAY YOU DO.

The U-shaped frame raises and lowers the back to the ideal height, setting the lumbar support in the optimal position. Simply reach back and lift or lower the frame as required.

FEATURED: YOU MIDBACK AND HIGHBACK WITH M3 MESH IN EBONY, ALUMINUM FRAME, AND UPHOLSTERED SEAT IN OASIS NIGHT.

The You frame features an activation dial that causes the mesh to bow and provide the precise support between the lumbar and ribcage, gently lifting you into the proper position. Simply turn the dial to increase or decrease the degree of curve in the mesh.
